

Application Goals

1. User-Friendly Interface: Ensure the application is easy to navigate and use.
2. Secure User Authentication: Implement secure login and registration features.
3. Efficient Product Management: Allow users to add, view, and manage paintings in their profile.
4. Order Process: Facilitate a smooth ordering process, including product search and order form submission.

Users' Objectives:

Basic Objectives:

1. Account Management: Users should be able to create an account and log in securely.
2. Profile Customisation: Users can add paintings to their profile and manage them.

Advanced Objectives:

1. Product Search: Users can search for specific paintings using filters (e.g., description, title).
2. Order Placement: Users can fill out an order form with necessary details and place an order for the selected paintings.

Scenarios

Basic Scenario

1. User Logs In:
 - Action: User logs into the application.
 - Outcome: User is authenticated and redirected to their profile/dashboard.
2. User Adds Paintings to Profile:
 - Action: User navigates to the section where they can add new paintings.
 - Outcome: User adds details of the painting (title, artist, description, image, price, etc.) and saves it to their profile.

Advanced Scenario

1. User Logs In:
 - Action: User logs into the application.
 - Outcome: User is authenticated and redirected to their profile/dashboard.
2. User Searches for Product:
 - Action: User uses the search bar to find specific paintings, applying filters as needed.
 - Outcome: Search results are displayed based on user's criteria.
3. User Fills Out Order Form:
 - Action: User selects a painting to order.
 - Outcome: User fills out the order form with personal and payment details.
4. User Places the Order:
 - Action: User submits the form.
 - Outcome: User receives confirmation.
